Over his 50 years international career, Michael Drucker has become recognized for his expertise in the design, implementation, and management of information systems. As a resourceful versatile, businessman, executive, and advisor he has founded three consulting companies, a communication company, and a software application company in the patient accounting and medical insurance field.

Mr. Drucker is the Founder and President of Michael H. Drucker Consulting, a virtual company organized in 1998 and structured to provide electronic commerce solutions using the latest internet hardware/software technologies to take business problems and turn them into business opportunities.

Areas of expertise include:

- Design, development, and implementation of business and computer systems for financial, distribution, administration, and personnel functions across many types of diverse companies.
- Custom creation of support tools and report generators for payroll, billing, inventory control, and production control.
- Management of IT teams in areas of internal/external Portal applications, CRM, One-to-One marketing, rich-media advertising, and Video-on-Demand entertainment.
- Creation and management of Regulatory and compliance reporting systems.
- Management of business processes in user security, banking, insurance, real estate management, outpatient accounting, utility billing, retail POS, fulfillment, and a variety of other miscellaneous systems.
- Creation of technical manuals, white papers, and internal technical courses in the latest hardware systems, software languages, system administration, network administration, and database technologies.

Developed Rapid Service Improvement - a TQM concept for the service industry. Using cross-functional teams in weekly assignments, improved work flow of business processes by removing waste and removing the silos built over time. As part of this process, management was taught how to manage the new cross-functional work groups created by RSI.

Current **client base and function** served consists of:
